Manuel Sadosky Foundation

This Foundation is a public-private institution whose goal is to encourage articulation between the scientific - technological and productive structure in the ICT area. It was established by Decree 678/09 and is chaired by the Minister of Science, Technology and Productive Innovation.

- Vinculation between universities and enterprises
- Big Data
- ICT Security
- Programa Conectar Igualdad
- ICT Careers Promotion

Manuel Sadosky Foundation

The main objectives are:

Create Research and Development (R&D) Centers of high scientific level according to the needs of industry and society, both nationally and regionally.

Support the creation of scientific and technological networks for the participation of R&D institutions and the business sector.

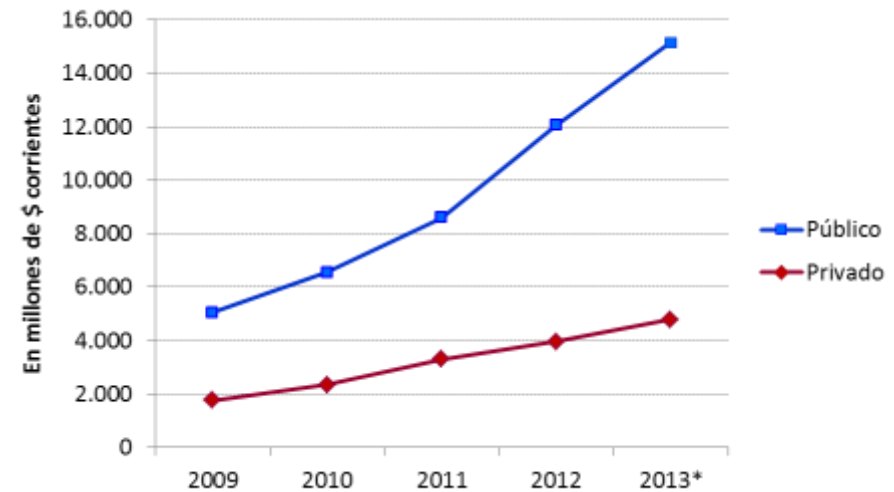

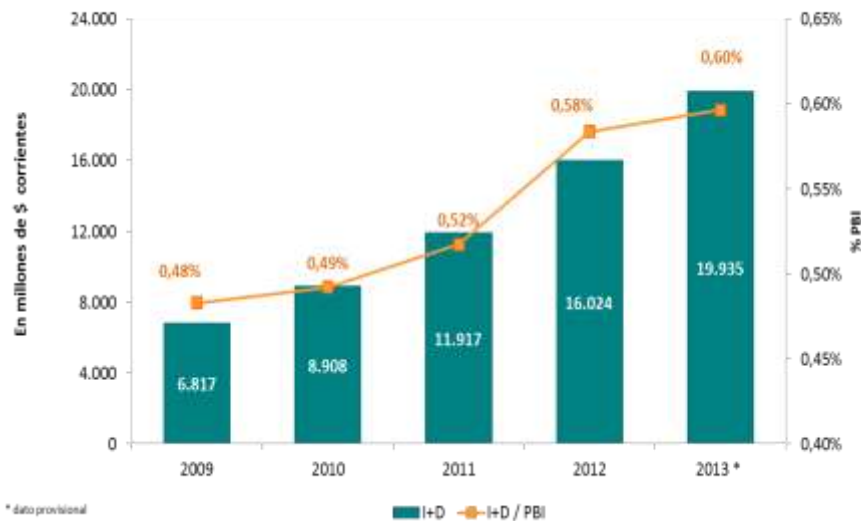

Promote human resource development oriented to training researchers specialized in priority areas according to sectorial strategic plan.

Establish international links to generate cooperation processes that contribute to the sector growth.

Provide advice to public and private sectors for the development of strategies related to research and development in areas related to ICT.

Generate management capabilities for the creation, development and consolidation of technology-based companies (EBT).

Investment in R&D

Main ICT Clusters in Argentina

Polo Tecnológico Bahía Blanca & Tecnópolis del Sur: 19 enterprises, 2 government units and 1 university
